Britania University

B.Sc. in Computer Science & Engineering (CSE)
currenty studying here

PROJECTS

- Worked on developing a photo gallery web app and a hotel booking website,which was created at fully unique way by me.Used the React js Framework along with Html5, Css3,Bootstrap and JavaScript to build it.The code was written from scratch and was made to be compatible within all browsers. Used git and github to manage version control ,also hosted it at netlify to deliver them as assignments.
- Photo gallery website: https://photo-gallery-app-51ad5.web.app/ ,github link: https://github.com/pronoyc11/Photo-gallery-app
- I have also made a finance app and a book review app with react native.At the finance app people could manage their expenses and incomes with various id.And in the book review app people would have to login to make a review and add them on favourites.
- I have used both mongo db and firebase as a database in my various projects.
- I've made an demo app with flutter for a resturant where users can explore different foods that are available on that restaurant and add those to favorites.
- I've also made an app with integration of camera and map features with flutter. The app was designed to store the details of user's favorite places.

WORK EXPERIENCE

Frontend developer

Freelancer (August 2022 - Present)

- Developed using CSS, HTML, JavaScript and React js to enhance function clarity and user experience on web pages.
- Worked with Back-End Developer to edit existing projects on certain websites.
- Participated on online meetings to discuss current and future projects and strategies on how to produce efficient work.
- Edited existing codes to improve browser compatibility and mobile responsiveness.
